

D327

HIGH FOAM CLEANER AND SANITISER

- **Economical - a little goes a long way**
- **Powerful - kills bacteria**
- **High foaming - clings to surfaces for effective action**

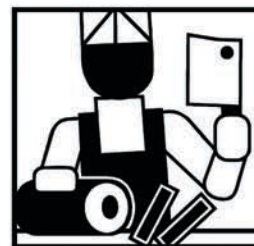

D327 cleans and sanitises in one operation and is specifically designed for use through a pressure washer or lance with a foaming attachment.

USES

A hypochlorite based, highly alkaline food plant cleaner that produces a dense clinging white foam in application.

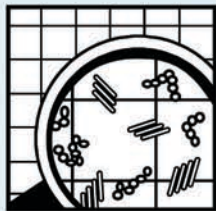

Ideal to remove carbonised deposits, dried grease and oil, blood, protein, and starch from plastic walls and ceilings, ceramic tiles, vinyl and plastic coatings, and stainless steel machinery and equipment.

Ideal for use in food preparation, food handling and food storage areas.

DIRECTIONS

For optimum results, dilute 1 part D327 with 50 parts hot or cold water. Apply through a pressure washer or lance with foaming attachment. Allow approximately 10 minutes contact time. Rinse away thoroughly with hot or cold water through a pressure washer.

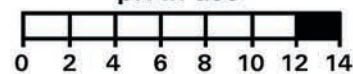

Use biocides safely. Always read the label and product information before use.
